Profession is a term coined by the Geoprosessional Business Association to connote various technical disciplines that involve engineering, earth and environmental services applied to below-ground ("subsurface"), ground-surface, and ground-surface-connected conditions, structures, or formations. The principal disciplines include, as major categories:

Peak Oil is the theorized point in time when the maximum rate of extraction of petroleum is reached, after which it is expected to enter terminal decline. Peak Oil theory is based on the observed rise, peak, fall, and depletion of aggregate production rate in oil fields over time. It is often confused with oil depletion; however, whereas depletion refers to a period of falling reserves and

The long term trend is not statistically different from zero. June 2018 is not yet available at the NOAA website, but from what I've seen for the global June climate forecast system map at Weatherbell, it looks like it was near the long-term (20th century) average. The memo also made mention of the widespread record warmth the U.S. experienced in May, 2018.
