

# The Greatest Show On Earth The Evidence For Evolution

Evidence of common descent of living organisms has been discovered by scientists researching in a variety of disciplines over many decades, demonstrating that all life on earth comes from a single ancestor. This forms an important part of the evidence on which evolutionary theory rests, demonstrates that evolution does occur, and illustrates the processes that created earth's biodiversity. Evidence for a recent dating for Adam, 14,000 to 15,000 years ago. Significant energy events in earth's and life's history as of 2014. Energy event . Timeframe. Significance. Nuclear fusion begins in the sun. c. 4.6 billion years ago ("bya") provides the power for all of earth's geophysical, geochemical, and ecological systems, with the only exception being radioactivity within earth. The concept of a crocoduck was used by young-earth creationists and certain other creationists to claim that the absence of any half-crocodile, half-duck creature disproves evolution, an argument that quickly became a meme used to ridicule a common misrepresentation of the theory of evolution, namely, that the theory predicts forms intermediate between any two currently living evolution: evolution, theory in biology postulating that the various types of plants, animals, and other living things on earth have their origin in other preexisting types and that the distinguishable differences are due to modifications in successive generations. It is one of the keystones of modern biological theory. Ultra high precision analyses of some of the oldest rock samples on earth by researchers at the university of bristol provides clear evidence that the planet's accessible reserves of precious

evolution is one of the greatest theories in all of science. It sets out to explain life: specifically, how the first simple life gave rise to all the huge diversity we see today, from bacteria to http://bigthink one of the crucial arguments against evolution is its status as a mere 'theory;' here richard dawkins corrects this specious use of the term and
